Kuzma Korolev

FRONTEND / FULLSTACK DEVELOPER

From interface to a working product.

Commercial web development since 2023. I connect thoughtful interfaces with APIs, backend services and reliable delivery - from requirements to launch and maintenance.

01 Experience

Sber

Junior Frontend Developer / July 2026 - present

Since September 2026: frontend development for POTOK's B2B+ goal-tracking module at Sber with Next.js, Feature-Sliced Design (FSD) and styled-components. Typed API integration for comment validation, dashboard card improvements, component decomposition and light/dark themes.
Also worked on EventMatch: AI-assisted event discovery with Next.js, a React Telegram Mini App, AI tools and specification-driven development. Within my first month on the internal project, proposed and successfully implemented a migration to Vite, cutting build time from 15 to 5 minutes (3x faster).

Freelance

Fullstack developer / January 2023 - present

Build commercial web applications and digital services. Handle client requirements, architecture, frontend and backend, deployment, maintenance and infrastructure.

Codex IT

Frontend developer · internship / July - August 2025

Contributed to an internal company messenger: UI components, forms and application state in an existing React codebase. Worked with issue tracking and code review.

TOOLKIT

Interfaces

TypeScript · JavaScript · Vue 3 · Nuxt · React · Next.js · HTML / CSS · Tailwind CSS · Nuxt UI · MUI

State and data

Pinia · Zustand · Redux · Vuex · Zod · REST API · WebSocket

Beyond frontend

Node.js · NestJS · Prisma · PostgreSQL · Docker · GitLab CI/CD · Nginx · Tauri · Electron

EDUCATION

Lobachevsky University

Software Engineering
Bachelor's degree
Expected graduation: 2027

Flang + Codex IT / 2025
HTML Academy / 2024

LANGUAGES

English - C1, Advanced
Russian - Native

02

Selected projects

Web applications, services and mobile tools. More details and project context at jujich.dev.

01

Jujich Services

Nuxt 4 / Pinia / NestJS / Python / Grafana | Development and operations

Web interface, Telegram Mini App, bot and admin panel for VPN subscriptions. Account management, device setup and monitoring with Prometheus, Grafana and Loki.

02

EventMatch

React 19 / Next.js 16 / TypeScript / SWR / Tailwind CSS | Implemented

Event discovery with filters, a calendar, AI search, favorites and moderation. A React / Next.js interface with URL-based filters and role-based access.

03

Online learning platform

Nuxt 3 / TypeScript / NestJS / S3 / HLS | Implemented

Role-based student, tutor and admin areas; a drag-and-drop course editor, HLS video and assignments. Multipart S3 uploads with progress tracking and retries.

04

Forma - CMS with an AI editor

Vue 3 / TypeScript / Express 5 / OpenAI Responses API | Local MVP

Local CMS MVP with manual and AI editing, desktop/mobile previews, version history and starter exports for Nuxt and Next.

05

Sales management CRM

Nuxt 4 / NestJS / PostgreSQL / MCP / OAuth | MVP

Leads, deals, kanban and team tasks with company data isolation. CRM imports and an MCP interface with OAuth and scoped permissions for AI agents.

06

MedImages

Nuxt 4 / Tauri 2 / Kotlin / IndexedDB / SQLite | Prototype

Image collection and an upload queue using IndexedDB on the web, SQLite and WorkManager on Android. State survives restarts; remote uploads still need end-to-end verification.

07

Mafia game host dashboard

Nuxt 3 / Capacitor / NestJS / Offline-first | Implemented

Host dashboard for in-person games: roles, night actions, voting and a recoverable timer. A local Android game engine with an offline queue and one-way synchronization.

08

UrPom B2B

Nuxt 4 / CMS | Implemented

Editable services and pricing with CMS publishing through GitLab CI. Enquiries are queued and delivered independently to a CRM and Telegram, with retries and deduplication.

ALSO IN MY LAB

POTOK: goal-tracking frontend for Sber’s internal platform. AI agents for business: instructions, tool integrations and workflows tailored to company needs.
